Step 1:
Wash the hair at least 3 times with the Inoar Argan Oil Deep Cleaning Shampoo and rinse the hair well. Repeat this more than 3 times if its necessary.

Step 2:
Make hair 100% dry using a hair dryer.

Step 3:
Shake the Inoar Argan Oil Smoothing bottle well before use. Divide the hair into 4 pieces, Apply the product 1 cm far from the scalp, to the hair strands whit a brush. Then use a thin comb to comb your hair, the remaining product on the comb can be reused for the next hair strand. Working from the neck upwards. Leave the Inoar Argan Oil Smoothing Treatment for 30 minutes in the hair, for chemically treated hair this is 45 minutes.

Step 4
Carefully rinse the hair with lukewarm water for 20 seconds.

Step 5
Make hair 100% dry using a hair dryer.

**pay attention:** to avoid hair burning and hair damage, the hair must be 100% dry. Before you use the hair straightener. From experience we know that even after hair drying, the hair points may still be damp, make sure it is 100% dry.

Step 6
Divide the hair into 5 parts. Take a hair lock of 1 centimeter thick and slide the hair straightener down 10 times on each hair strand. Set the hair straightener on next temperature:

*230 ° C for hair in good condition;
*210 ° C for chemically treated hair;
*190 ° C for fine and thin hair.

Working from the neck upwards.
Step 7
After step 6, you have two options:

1. let the hair cool down for 10 minutes. Then rinse hair without using The shampoo, then apply the Inoar Argan Oil Reconstructing Balm in the hair for 10 minutes. Then rinse well without using shampoo, from now on, do not wash her for 3 days. Hereafter bring the hair to the model as you are used to.

2. For an intensive result you do not have to rinse the hair, and leave it for 3 days. After three days you can wash the hair with shampoo then apply the Inoar Argan Oil Reconstructing Balm in the hair for 10 minutes and Rinse the hair. Make the hair towel dry and bring the hair to the model as you are used to.
